Global Information Technology Solutions Provider

CHALLENGE BOUNDARIES AND UNCOVER NEW POSSIBILITIES

Visionary Integration Professionals thrives in environments where we can achieve breakthrough results for our clients.

VIP has been helping clients challenge the boundaries of technology and business process for over 10 years. Breakthrough results occur when the interdependencies of strategy, expertise, methodology, and enabling technologies are executed flawlessly. That's where VIP works to carefully evaluate and uncover new possibilities to achieve measurable business results. VIP offers customized solutions, proven comprehensive and efficient delivery methodologies, and consultants with expertise, resourcefulness, and the commitment to deliver the quality you need.

Delivery

VIP's delivery approach is based upon close collaboration and teamwork with each client to fully appreciate the unique business needs involved in a solution. Our delivery philosophy incorporates end-to-end accountability. Our consultants not only specialize in providing the "know how", we also get the job done. We pride ourselves in offering global delivery options that encompass on-shore, off-shore, and project-based resources.

At VIP, we embrace these basic tenets through our delivery methodologies, viPRISM and The Matrix Methodology®. VIP consistently deploys these approaches for project engagements to follow a proven, robust, yet flexible process that ensures success. These methodologies are a synthesis of "best of breed" technology practices and templates, as well as project management good practice philosophies espoused by IEEE, CMMi, ITIL, and PMI.

As part of our standard for excellence in delivery, VIP offers a training curriculum as an effective way to complete the knowledge transfer. Courses are another mechanism with which we can pass on our expertise to your staff. Our goal is to help you maximize your inside resources and collective knowledge base, as well as help you make the most of your software investments.

Commitment

The primary contributor to VIP's success is unwavering commitment to a true practice-based solutions model where VIP consultants embrace the client's need for success. Our commitment to quality solutions is exemplified by our outcome-driven approach utilized in every engagement. Our goal is to deliver value by truly understanding the client's business and technical needs, sharing accountability for the results.

Business Intelligence and Data Warehousing

VIP delivers high-performance business intelligence and data warehouse solutions to help clients leverage data from enterprise sources to optimize decision making and achieve strategic objectives. VIP efficiently implements data initiatives that turn your data into meaningful and actionable information. VIP can assist you from initial project inception with readiness assessments, Return on Investment analysis, requirements gathering and project planning, all the way through execution.

VIP leverages business strategy and process expertise together with extensive business intelligence, data warehouse, and data quality experience into efficient Master Data Management (MDM) solutions. A series of business and technology best practice activities bring together business stakeholders and IT sponsors into focused teams that get quick results while providing for long-term success.

As an on-going service to the business intelligence and data warehouse community, VIP offers a FREE online global community for data integration, data warehousing, and business intelligence professionals. Please visit VIP's InnerCore community.

SAP Integration and Consulting

Through the acquisition of MyITgroup, VIP maximizes the return on your SAP investment through effective solutions, quality people, and repeatable processes. VIP delivers value through a trio of dedicated consulting and integration services: solutions, outsourcing, and workforce. Through this service model, VIP is establishing new best practices and delivering a new level of accomplishment and flexibility in SAP solutions.

Technology Integration and Operations

VIP integrates technology to solve business problems. Through leadership, life-cycle methodology, best practices, and quality experienced staff, VIP delivers solutions that increase revenue, reduce costs, improve efficiency, and enhance customer satisfaction through the integration and ongoing operation of technology. VIP can assist you with custom business, integration, portal, and BI solutions, as well as technical assessments, application management, system operations, and maintenance.

Talent and Learning Management Solutions

VIP delivers cutting-edge technology platforms and custom online courseware to support learning and training requirements for organizations of every size. VIP offers full-service e-learning and knowledge management solutions, complementing our robust infrastructure product suite. Our offerings include Meridian Global 2008.1, Meridian Anywhere 3.0, and a comprehensive range of services including consulting, custom courseware development, implementation, and application hosting.

Quality Management

VIP helps its clients mitigate risk, protect revenue, increase efficiency, and enhance market position by specializing in software quality management. VIP offers a full range of quality management services to deliver critical legacy, web, client/server, training, implementation, HP Mercury Software, and independent oversight, verification, and validation solutions.

Management Consulting

VIP helps its clients solve business problems and manage change by considering how to balance the interdependencies of strategy, people, process, and enabling technologies. VIP offers a suite of services that includes business case and ROI analysis, feasibility studies, project health checks, risk assessments, business process re-engineering, oversight, verification, and validation, and HP Mercury Business Technology Optimization (BTO) software solutions.
