

Excellence in Delivery

With expertise in QM strategy, functional test automation, load and performance testing, and production monitoring, VIP can offer complete delivery support to build a center of excellence around your testing assets. VIP brings best practices to assess your current quality management capabilities against your objectives and develop a framework to execute an effective quality management program. We use test management tools and processes that provide thorough, end-to-end coverage, production readiness of your system through performance validation, and monitoring of your live environment to ensure a positive end-user experience.

Challenge Boundaries

Quality Management (QM) is becoming increasingly important to organizations to mitigate risk, protect revenue, and increase efficiency. Ensuring accurate behavior across business processes and successful implementations can be difficult without good quality initiatives. Visionary Integration Professionals (VIP) challenges boundaries to ensure proper requirements coverage, thorough testing, robust application performance and availability, and ultimately successful end-user adoption.

Uncover New Possibilities

VIP's QM solutions uncover new possibilities that maximize your investment with a disciplined approach to quality management designed to organize activities, automate processes, and store and track results so that you can diagnose problems before they occur. VIP specializes in helping clients ensure quality, while always maintaining a balanced view of bigger picture business objectives. VIP offers a full range of QM services for critical legacy, web, client/server, and packaged ERP and CRM applications.

VIP's innovative QM solutions have helped clients increase customer confidence while managing IT costs more efficiently, automating key quality processes across IT applications, and measuring IT effectiveness from a business perspective.

About VIP

Established in 1996, VIP is a global technology and outsourcing firm that has provided solutions for over 900 clients in multiple industries as well as Federal, State, and local government. VIP helps companies challenge boundaries and uncover new possibilities to increase productivity, maximize revenue, improve performance, mitigate risk, and reduce costs. With nearly 1,000 staff, VIP offers expertise in Business Intelligence and Data Warehousing, SAP Integration and Consulting, Technology Integration and Operations, Talent and Learning Management, Quality Management, and Management Consulting. VIP's corporate headquarters is located in Folsom, California with offices in Sacramento, Minneapolis, Denver, New York City, DC Metro, Houston, Dallas, and Bangalore, India.

VIP's Quality Management solutions include the following:

Quality Management Strategy

Knowing what to test is as important as how you test it. VIP's extensive industry knowledge can be leveraged to validate best practices, define best of breed tool sets, and implement a true quality assurance center of excellence for your organization. To obtain accurate behavior across business processes, effective QM is essential.

Outsourced Quality Management Solutions

VIP delivers the right combination of on-site, off-site, and off-shore resources to meet your quality management needs. Our SmartSourcing strategy lets you outsource some or all of the quality functions to allow you to concentrate on your core activities. VIP provides skilled and experienced formal training as well as mentoring support. VIP prides itself on its ability to tailor solutions that meet the unique needs of its clients for every facet of the QM life cycle.

Application Quality

Effective quality management is essential to obtain accurate behavior across business processes. VIP offers test planning, test design, test management, and test execution expertise to support your quality objectives. Our experts can design and execute programs that include technical, business process, and performance testing using manual and automated processes and tools.

Application Performance

Once your business processes perform accurately, you also need to assess whether the application can meet performance requirements. VIP has expertise in performance and load testing to tell you how your application will perform in production. With sophisticated diagnostics skills, our team can identify the root cause of issues and how to fix them.

Go-Live Risk Management

To make an informed decision to go-live, you need to know the status of the program. VIP can define and implement Key Performance Indicators (KPIs) to evaluate the risk of the implementation. KPIs focus on those components with the highest risk, such as requirements coverage, the thoroughness of testing, defect trends, and response time.

Business Availability

Effective application management can enhance the availability and performance of end-to-end business processes across applications. VIP offers expertise in tools and processes to proactively monitor application availability in real-time from the end-user viewpoint to identify issues before your customers experience problems.

HP Business Technology Optimization (BTO) Software Solutions

VIP supports and implements all HP BTO software solutions for information technology strategy, Applications, and operations. VIP is a reseller of all HP products. In addition, VIP offers HP Certified Product Consultants and Instructors to support the implementation of HP products.

Federal Agency

VIP provided a quality management solution that included outsourcing of performance testing and a defined framework to support planning, designing, executing, and analyzing quality initiatives. VIP conducted annual performance testing for a highly visible application used by millions of users during a concentrated period of time. In addition, during the off-peak season, VIP conducted application/web server tuning and capacity planning for a series of other applications supported by this large Federal agency.

Large Insurance company

VIP provided management of the testing process and mentoring services for client staff. In addition, VIP conducted functional testing and load testing during the rollout of the SAP system for this large insurance company. This led to early identification of application and performance challenges preventing them from becoming costly production problems.
