

QUALITY MANAGEMENT

Challenge Boundaries

Quality Management (QM) is becoming increasingly important to organizations to mitigate risk, protect revenue, and increase efficiency. Ensuring consistent behavior across business processes and successful implementations can be difficult without good quality initiatives. Visionary Integration Professionals (VIP) challenges boundaries to ensure proper requirements coverage, thorough testing, robust application performance and availability and ultimately successful end-user adoption.

Uncover New Possibilities

VIP's QM solutions uncover new possibilities that maximize your investment with a disciplined approach to quality that is designed to organize activities, develop tailored processes, realize and gain efficiencies so that you can diagnose problems before they occur. VIP specializes in helping clients ensure quality while always maintaining a balanced view of bigger picture business objectives.

VIP's innovative QM solutions have helped clients increase customer confidence while managing IT costs more efficiently, streamlining key quality processes across IT applications, and measuring IT effectiveness from a business perspective.

Excellence in Delivery

With expertise in QM strategy and methodology, functional test automation, load and performance testing, and production monitoring, VIP can offer complete delivery support to take your team to the next level. We bring best practices to assess your current quality management capabilities against your objectives and develop a framework to execute an effective quality management program. Let us help you plan and build a center of excellence around your testing assets.

VIP offers a full range of QM solutions and managed services across all technologies including experience in:

- ERP & CRM Testing Solutions
- Strategic Planning
- Functional and Automation Testing
- Load and Performance Testing and Tuning
- Production Application Monitoring
- Training and Mentoring

Quality Management Strategy

Knowing what to test is as important as how you test it. VIP's extensive industry knowledge can be leveraged to implement best practices, define best of breed tool sets, and tailor repeatable quality management processes that fit your organization's specific needs. We will work with you to make your overall quality goals a reality.

Application Quality

Effective quality management is essential to ensure accurate behavior across business processes. VIP offers test planning, test management, test design and test execution expertise to support your quality objectives from project definition through implementation. Our experts have the technical skills and business savvy to ensure the requirements defined were successfully implemented.

Application Performance

Once your application meets the functional requirements, you need to assess whether the application can meet performance requirements. VIP can help you understand what is needed to ensure optimal performance. We have expertise in all aspects of load and performance testing. With sophisticated diagnostics skills, our team can identify the root cause of an issue and tell you how to fix it.

Production Monitoring

VIP offers expertise in tools and processes to proactively monitor applications in production from the end-user experience. We can help identify issues before your customers experience problems and revenue is impacted.

ERP and CRM Testing Solutions

VIP offers Quality Management services for SAP including QRM, Lawson, and Oracle products among many others. Our experienced consultants provide strategic planning and leadership along with test case writing and execution for functional, automation and performance testing. Whether it's an implementation, upgrade or maintenance of an application, VIP will ensure your applications are delivering high quality.

Smart Sourcing

VIP delivers the right combination of on-site and off-site resources to meet your quality management needs. Our Smart Sourcing strategy allows outsourcing of some or all of the quality functions to allow you to concentrate on your core activities. VIP prides itself on its ability to tailor solutions that meet the unique needs of its clients for every facet of the QM life cycle.

HP Business Technology Optimization (BTO) Software Solutions

VIP is an Elite partner and re-sells, supports and implements HP BTO software solutions. In addition, VIP offers HP Accredited System Engineers and Certified Instructors to support the implementation, maintenance and training on HP products.
