

Web Intelligence XI 3.0: Advanced Report Design

Business Objects Code: QA320V3.0

SAP Code: BOW320

Prerequisites

Prerequisite Education

To be successful, you must have attended the following offering or have the equivalent knowledge of:

- Business Objects Web Intelligence XI 3.0: Report Design

Prerequisite Knowledge/Experience

To be successful, you must have working knowledge of:

- Experience designing Web Intelligence reports

Duration

1 day

Audience

The target audience for this course is report designers who are experienced Web Intelligence users and who need to create complex Web Intelligence documents.

Description

- Business Objects Web Intelligence™ is a query, reporting and analysis tool that allows you to access the data in your corporate databases directly from within Business Objects Enterprise™ InfoView and to present and analyze this information in a Web Intelligence document.
- This one-day instructor-led classroom course is designed to give you the comprehensive skills needed to apply alternative query and reporting techniques when creating complex Web Intelligence documents.
- After completing this course, you will be able to create combined queries and use sub-queries.
- You will also be able to use character and date string functions, create variables using "If" logic, and redefine calculation contexts.
- The course also provides an optional appendix describing how to link Web Intelligence documents using the OpenDocument URL command.

Content

- Advanced Query Techniques
 - Using combined queries
 - Using sub-queries
 - Creating a query based on another query
 - Changing data sources
 - Using the query drill
 - Using query sampling
 - Understanding dimensions and details
- Character and Date String Functions
 - Using character string functions
 - Concatenating different data types
 - Using date functions
- Calculation Contexts
 - Understanding calculation contexts
 - Redefining calculation contexts
- Using If Logic
 - Grouping data with If() logic
 - Modifying calculation behavior with If() logic
 - Using IF/ELSEIF
- Additional Reporting Techniques
 - Using data tracking
 - Displaying data restricted by a filter or ranking
 - Using additional report functions
- Linking to Documents
 - Linking to documents and URLs in Web Intelligence
 - Creating hyperlinks in the HTML Report Panel
 - Creating hyperlinks in the Web Intelligence Rich Client and Java Report Panel

Notes

Additional Business Objects Education

- Business Objects Web Intelligence XI 3.0: Report Design
- Business Objects Universe Designer XI 3.0: Universe Design
- Business Objects Universe Designer XI 3.0: Advanced Universe Design
